CLASSIFICATION

- **GENERAL**

Only athletes that meet the World Para Athletics classification rules and have a designated sport class will be eligible for entry. It is the responsibility of each country to ensure that its Athletes are appropriately classified at a national level prior to entry.

A certificate attesting each Athlete's Class, issued by the country's National Paralympic Committee or National Sport Federation, must be attached to the ISF ERAS system during the registration process.

The Paralympic system of classification intends to guarantee fair competition between all athletes. Athletes go through the classification process before taking part in the competition, during which they are assessed and allocated a sport class by the degree and nature of eligible impairments. This classification is carried out by a panel of medical and technical experts responsible for evaluating the impact of the impairment on specific tasks and activities fundamental to the sport and the athlete's sport performance. There is no single classification system that applies to all sports, due to their history and the way they are played, which is why each discipline has its own system.

Paralympic classification is a functional classification system, in which all athletes who compete in the same category are sure to have similar functional abilities in terms of movement, coordination and balance. That is why athletes with different impairments may be allocated the same sport class and compete against one another.

The classifications outlined below are designated by a letter, usually the initial of the sport, for example T for Track, and a number. Generally speaking, the lower the figure, the greater the impairment, though this is not always the case.

Athletes' classification in Para Athletics, is defined by a letter and a number: T for track and jump events and F for field events. Figures represent impairments as follows:

- 11-13: vision impairment
- 20: intellectual impairment
- 31-38: co-ordination impairments
- 40-47: short stature, upper limb competing with prosthesis or equivalent, lower limb competing with prosthesis or equivalent.
- T51-54: wheelchair races
- F51-58: seated throws
- 61-64: lower limb competing with prosthesis.

• **PARA ATHLETES' IMPAIRMENT CATEGORIES**
